## **Forrest Solutions, Cushman & Wakefield Join Crystal Point Service Teams**

By Betsy Kraat

JERSEY CITY -- Fisher Development Associates has announced Forrest Solutions and Cushman & Wakefield as the newest members to the service and marketing teams at Crystal Point, the collection of 269 luxury condominium homes on Jersey City's Hudson River waterfront.

Forrest Solutions has been retained to handle on-site staffing and concierge services at the 42-story building and Cushman & Wakefield has been named exclusive sales broker for the ground-floor riverfront restaurant commercial space at Crystal Point, according to Brian Fisher, a development principal.

Forrest Solutions will ensure residents at Crystal Point receive the ease and convenience of an on-site concierge available to handle daily tasks ranging from dog walking, maid services, dry cleaning and floral requests to concert and event tickets and discount car services.

The 5,570-sf ground floor commercial condominium at Crystal Point is now available for sale. The prime riverfront space is fully-approved for a restaurant with seating for 150 inside and 82 outside. The commercial condominium offers 225 linear feet of glass frontage overlooking Jersey City's waterfront walkway with direct views of the ever changing Hudson River and New York City skyline. Parking will be available via the building's on-site valet garage.

The unfinished shell space, which offers 13' 2" from slab to slab, will be turned over to the buyer for build-out.
